2014 - 3

2015 - 2

2016 - 7

2017 - 3

PHD IN DIGITAL ARTS AND HUMANITIES PROPOSED CURRICULUM	
YEAR 1	
Shared courses across both strands of Arts and Humanities:	
DAH INSTITUTE (5 ECTS) Convener: RIA Intensive seminar on various theoretical, methodological and research practices.	CONCEPTUAL INTRODUCTION TO DIGITAL ARTS AND HUMANITIES (5 ECTS) Conveners: TCD, NUIG, NUIM, UCC, RIA Theoretical grounding in the study and practice of Digital Arts and Humanities.
ARTS: Shared (inter-institutional) course	
HISTORY AND THEORY OF DIGITAL ART (5 ECTS) Convener: TCD, RIA, NUIG, NUIM Team taught, telepresent/virtual seminar focusing on the history and theory of the practice of digital and technologized art and the political and ideological issues of digital culture.	
ARTS: Institutionally specific, elective courses in digital production:	
DIGITAL ART PRACTICUM Ubiquitous Computing Topics, Performance and Technology, Programming (Interactive Digital Media, Topics in Film and Digital Video, Topics in Music and Electroacoustics (see attached list)	
HUMANITIES: Shared (inter-institutional) course	
HUMANITIES, ARTS AND NEW TECHNOLOGIES: TOOLS AND METHODOLOGIES (5 ECTS) Conveners: TCD, NUIG, NUIM, UCC, RIA Team-taught virtual seminar focusing on innovation in Digital Humanities, driven by theoretical reflection and technical skilling	
HUMANITIES: Institutionally specific, elective courses:	
Digital Scholarly Editions, Metadata Formats, Standards and Design, Visualisation and Design, Manuscript, Hyperspectral Analysis, New Technologies, Digital Media, and Multimedia, Computer Tools and Resources for Teaching and Learning the Humanities	

MA Programmes

- Why the MA DAH?
- Minimum Class Size : 6
- Base Camp for Phd
- Feed-in to Phd
- Why the online MA in Digital Cultures?
- University Policy – put 24 MA programmes online
- Admin required new title, new module codes!

Undergraduate Programmes

- What we had hoped to do
 - Small Range of options
 - 2 x 2000 level
 - 2 x 3000 level
 - Flexible, experimental, limited numbers
 - Pilot DH at UG, Test student response, Introduce DH into the BA Degree (CK101)
- What actually happened
 - Govt initiative to increase places in information technology.
 - BA DH&IT designed and approved in weeks (May) (CK118)
 - First intake: August

BA in Digital Humanities & IT

Year 4, Spring	Research Seminar (5 Credits)	Research Project (10 Credits)	Other CK101 Subject (10 Credits)	Research Project (10 Credits)	Digital Content Management (5 Credits) (P1 & P2)	Information Systems and Electronic Commerce (5 Credits) (P1 & P2)		
Year 4, Autumn		Research Methods (5 Credits)			Digital Content Management (5) (P1 & P2)	Information Systems and Electronic Commerce (5 Credits) (P1 & P2)	Digital Video Content Creation (5 Credits) (P1)	Digital Audio and Sound Technology (5) (P1)
Year 3, Spring	Placement or Year Abroad							
Year 3, Autumn								
Year 2, Spring	Digital Tools & Methodologies II (5 Credits)	Digital Curation (5 Credits)	Other CK101 Subject (10 Credits)	Introduction to Internet Information Systems (5) (P2)	Computer Animation (5) (P2)			
Year 2, Autumn	Concepts and Collaboration in Digital Humanities II (5 Credits)	Knowledge, Research and Learning (5 credits)		Introduction to Digital Media (5) (P1)		Authoring (5 Credits)	Web servers (5 Credits) (P1)	Introduction to Relational Databases (5 Credits)
Year 1, Spring	Digital Tools & Methodologies I (5 Credits)		Other CK101 Subject (15 Credits)	Fundamentals of Internet Computing 15 Credits P1/P2 (mainly end of year exam)	Fundamentals of Internet Computing 15 Credits P1/P2 (mainly end of year exam)	Programming in Python (5 Credits)		Usability Engineering (5 Credits) (P2)
Year 1, Autumn	Concepts and Collaboration in Digital Humanities I (5 Credits)	Introduction to Student Learning in the Digital Age (5 Credits)		Fundamentals of Internet Computing 15 Credits P1/P2 (mainly end of year exam)			Multimedia (5 Credits)

ber 16, 1938.

MAKING, VICTOR LESLIE,
 appointed Pro-Consul at Antwerp, November 8, 1939.

MAKINS, ROGER MELLOR, C.M.G.,
 born February 3, 1904. Educated at Winchester and Christ Church, Oxford. Elected Fellow of All Souls, 1925. Called to the Bar by the Inner Temple, 1927. Granted a Certificate as a 3rd Secretary in the Foreign Office or Diplomatic Service, October 16, 1928, and appointed to the Foreign Office, October 22, 1928. Transferred to Washington, April 19, 1931. Promoted to be a 2nd Secretary, October 22, 1933. Transferred to Oslo, May 12, 1934, where he acted as Chargé d'Affaires, and to the Foreign Office, September 3, 1934. Promoted to be an Acting 1st Secretary, September 11, 1939. Promoted to be an Acting Counsellor in the Foreign Office, August 1, 1940. Seconded to the Treasury for service with the Minister Resident in West Africa, July 1 to December 15, 1942, and as Assistant to the Minister Resident at Allied Force Headquarters, Mediterranean Command from January 19, 1943 to September 30, 1944. Promoted to be a Counsellor in the Foreign Office, August 1, 1942. Made a C.M.G. January 1, 1944.

MALCOLM, ANGUS CHRISTIAN EDWARD,
 born October 6, 1908. Educated at Eton and New College, Oxford. Granted a Certificate as 3rd Secretary in the Foreign Office or Diplomatic Service, and appointed to the Foreign Office, October 12, 1933. Transferred to Madrid, January 13, 1936. On the departure of the Embassy on August 1, 1936, was employed at Hendaya, the Foreign Office, Valencia and Barcelona. Transferred to Washington, August 4, 1938. Promoted to be a 2nd Secretary, October 12, 1938. Transferred to the Foreign Office,

The image shows handwritten annotations on the document. A blue circle highlights the name 'MAKINS, ROGER MELLOR, C.M.G.'. A blue arrow points from this circle to a handwritten box containing '007 D03 E X D1'. Below this box is another box containing 'POSTEM dato edate', with a blue arrow pointing to the 'EM' part. Below that is a box containing '1 15 1'. At the bottom, a blue circle highlights 'GM' and an arrow points to a box containing '1 City dtd sk d'. There are also various other scribbles and lines in blue and green ink.

How many thousand of my poorest subjects
Are at this hour asleep! O sleep! O gentle sleep!
Nature's soft nurse, how have I frightened thee,
That thou no more wilt weigh my eyelids down,
And steep my senses in forgetfulness?
Why rather, sleep, liest thou in smoky cribs,
Upon uneasy pallets stretching thee,
And hush'd with buzzing night-flies to thy slumber,
Than in the perfum'd chambers of the great,
Under the canopies of costly state,
And lull'd with sound of sweetest melody?
O thou dull god, why liest thou with the vile
In unwholesome beds, and lean'st upon the couch
A watch-case or a common tarun-bell?
(15) Wilt thou upon the high and giddy mast
Seal up the ship-boy's eyes, and rock his brains
In cradle of the rude imperious surge,
And in the visitation of the winds,
Who take the ruffian billows by the top,
Curling their monstrous heads and hanging them
With deaf'ning clamour in the slippery clouds,
That with the hurly death itself awakes?
Canst thou, O partial³ sleep, give thy repose
To the wet sea-boy in an hour so rude,
And in the calmest and most stillest night,
With all appliances and means to boot,
Deny it to a King? Then, happy low, lie down!
(20) Uneasy lies the head that wears a crown.

	002	and some form of personal Damascus Why are you in politics?	
	003		
	004	Wilson: I suppose the short answer is because politics are in me, as far as I can remember. Farther than that: they were in my family; for generations before me, as they were in the families of dozens of members of the Labour party. The first time that I can remember thinking systematically about politics was when I was seven. I was in hospital with appendicitis. My parents came in to see me the night after my operation and I told them not to stay too long or they'd be late to vote – for Philip Snowden. Then when I was in West Australia where my uncle was an Australian later President of the Upper House. That was my first political experience.	P F P, Lc

	<p>A report of preliminary findings and analysis from student discussion groups held on 7 U.S. campuses in Fall 2008, as part of Project Information Literacy. Qualitative data from discussions with higher education students across the country suggest that conducting research is particularly challenging. Students' greatest challenges are related to their perceived inability to find desired materials. Students seek "contexts" as part of the research process. A preliminary typology of the research contexts is developed and introduced. Finding contexts for "backgrounding" topics and for figuring out how to traverse complex information landscapes may be the most difficult part of the research process. Our findings also suggest that students create effective methods for conducting research by using traditional methods, such as libraries, and self-taught, creative workarounds, such as "presearch" and Wikipedia, in different ways.</p>

Caterina Fake's copy of Ulysses

Facts and Interpretations

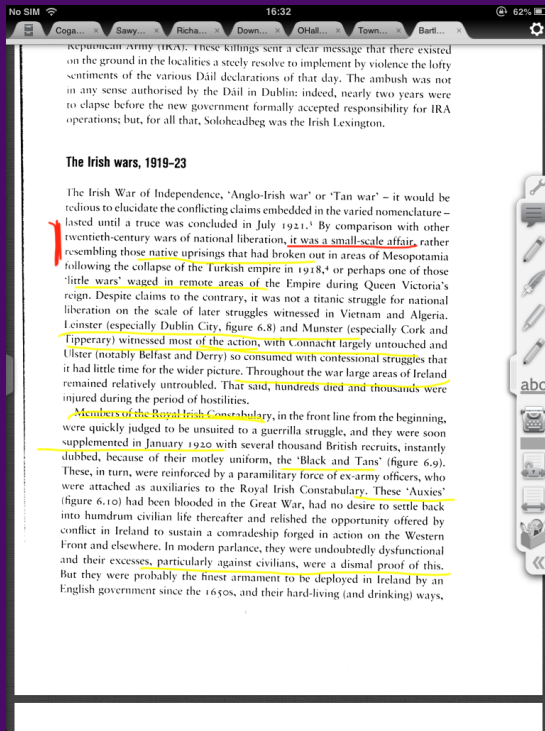

This emphasis on limiting the size of garrisons conforms to the dictates of early modern military commentators and theorists. In his *Writings* of 1673, Raimonde Montecuccoli anticipated garrisons of only one hundred to five hundred men for most bastioned fortresses; Prague's garrison was to stand at fifteen hundred men.²² Sir Roger Williams, a British participant in the Eighty Years' War, calculated that a two-thousand-man garrison could be considered a secure force "sufficient to guard against 10,000."²³ More broadly, in *Della Architettura Militare* (1599), Francesco de' Marchi noted that "behind good walls a small force can defy a much greater host."²⁴

Hypothes.is

the obsession of the age is with the original. Only the original possesses an aura,

I don't think this is true. Maybe you see the aura, or in other words 'understand' a painting better when it is in a place which it was originally intended for. Even if it is a facsimile. It doesn't make it 'more original' though. It just makes it more authentic. There is a difference between original and authentic, in my opinion.

[birtejo](#) *19/12/2018 13:04:56* in Public

Is it possible that the Venice version, undeniably a facsimile, is actually more original than the Paris original, she wonders?

What is the definition of 'original' for her then? Seeing a painting where it's creator actually bowed over and drew the lines gives you a different connection to the painting than seeing it in a place for which it was actually created. None of these connections are wrong. But per definition original means: *1. present or existing from the beginning; first or earliest. 2. created personally by a particular artist, writer, musician, etc.; not a copy.* With this in mind, her question is easily answered: No, it is not.

Mindmapping

Tools - Mindmapping

Enabled: Statistics Tracking

This week we're going knowledge mapping - read the two readings, watch the video and then pick a reading to map.

Reading/Video should not take more than an hour, budget a half hour to play with your chosen mindmapping app, and set aside about 2 hours to actually map out a reading.

There are arguments in favour of mindmapping by hand, and sharing it by attaching a photo, and that is perfectly fine for our purposes.

However, I do encourage you to have a go and use a digital tool. There are some excellent free mind mapping tools to experiment with.

[Freemind](#) is old now, but still excellent, and totally free and open source. It exports to images as well as several text formats. It only works on desktop PCs - Windows or Mac, and requires Java. Updates are not as frequent now, so it may become less usable on recent versions of the OS.

[Xmind](#) has excellent free versions for Windows, Mac and iOS, As with Freemind, I've used it comfortably for years.

[Simplemind](#) has free versions, but they are not as feature rich as Freemind or the free version of XMind - exporting can be a bit less intuitive. On mobile devices, Share as Image works well. It works on Windows, Mac, iOS and Android, so it allows me to access my mind maps on any device.

There are many others out there, but these are my top picks. You should not need to pay for the 'pro' versions of any of these - the free versions are adequate for experimenting for now. Others may not export well, or at all so if you do explore, make sure you can get your data out before you invest time in using one. **Whatever digital mindmapping tool you use, spend a few minutes working out how to export your map from is as an image.** (Getting your work out of any app so you can move it and re-use is as important as getting it in!)

Also note that digitally highlighting and annotating the article itself can be an important step in the process, if you are not comfortable in doing it in one leap!

Discussions

Rachel Mc Carthy

RE: Seeking information: Search Strategies

4 months ago

When searching for written information, I always use Google. I will type what I'm look for, and then read through the first page of results. I rarely go beyond the first page as the information tends to get more and more vague. I will open every search result in a new tab and then go through them to find the information that I'm looking for. If I cannot find what I'm searching for, I will reword my question and search again.

If I'm searching for video's or music, then I will always use YouTube. Once again, I will type what I'm looking for into the search bar, and scroll through the video's until I've found what I want. If I cannot find a specific video/audio, I will reword my statement and try again.

If I'm searching for research or academic information, I always use Google Scholar as I feel that it provides the most accurate and helpful results. However if I cannot find anything on Wikipedia or Google Scholar to help me, then I will branch out to other websites such as Arxiv for maths/science/computer related topics, or Wolfram Alpha for languages/history/art topics

RE: Seeking information: Search Strategies

4 months ago

The two articles I read were by Biddix and Colón-Aguirre, and I noticed many similarities, but also a few differences, between how I search for information and how the students in the articles searched.

In the Introductory paragraph of Biddix's article, he writes "Respondents consulted the Internet first before any other source, including experts, family members, government agencies, or libraries". I agree wholeheartedly with this statement. I personally do turn to the Internet and to websites such as Google and Wikipedia before consulting anywhere else. I find it a quicker and more efficient method of finding out information than asking family members or friends who might not know the answer, or who might have the wrong answer. However, I do understand that there are many websites with incorrect information on the Internet as well, which is why I only search for answers on what I believe to be credible sources i.e. Google, Wikipedia, Wolfram Alpha, etc. The library may be a more accurate and reliable source of information, but it is time-consuming and sometimes difficult to navigate. This can discourage students from using it, especially if they have a 1000-word essay due the next day. It can be difficult to balance credibility and efficiency, which is why I always turn to trusted websites before searching for books.

Colón-Aguirre's article deals with how reliable certain websites are, which is necessary to consider when writing an academic paper. But time is also an important factor, as one student writes "... I feel like it's hard to get a lot of information out of a book, unless you want to read the entire book...". My searching experience is similar to this, as such that it is difficult to find the single fact that you are looking for inside a 300-page academic novel. It dissuades students from searching the library, a similar point that was made in the Biddix article. It is far easier to source information on the Internet than make your way through a research paper, and this is a habit that I share with the students throughout this article.

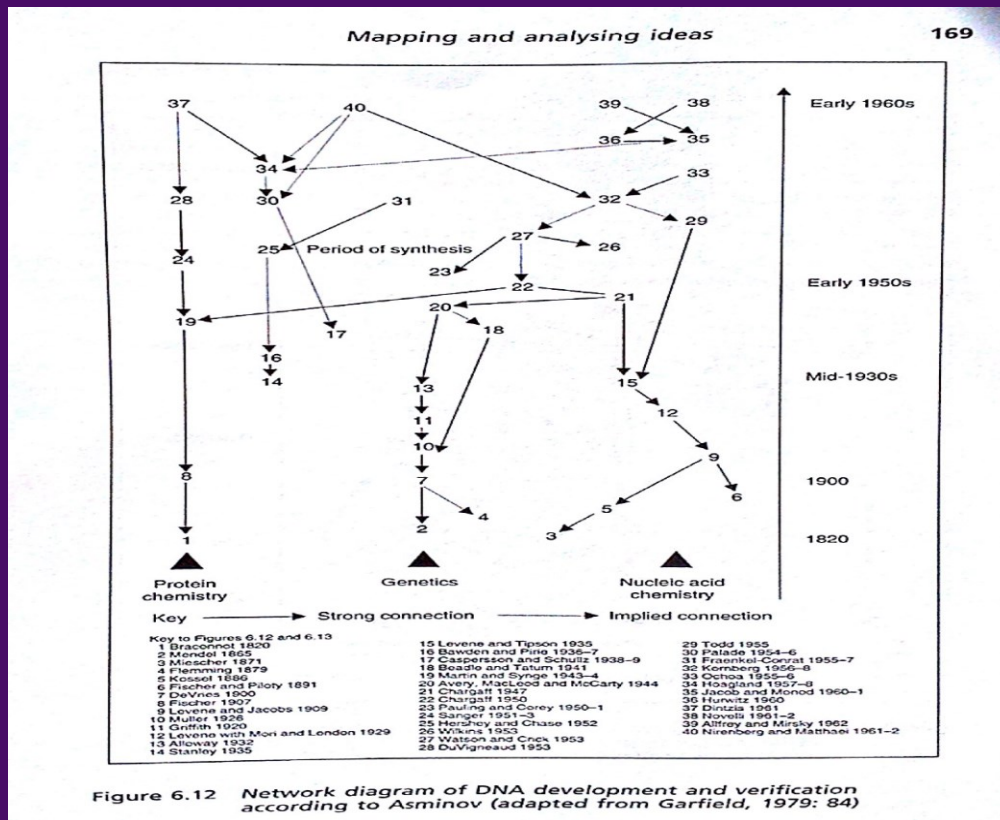

Joshua Nyagaya

RE: Seeking information: Search Strategies

1 month ago

Hi Rachel. I admire the process you go through to find what you are looking for. Not a lot of people use the 'reword and search' technique as they would often get frustrated when the content that they are looking for doesn't come up the first time. Personally, I consider myself a very patient young buck, so I would also use this way of searching. I'm glad to see that we have that in common. Merry Xmas!

Debates

Encoding

to **the root of identity**. You get to that **base, where you can't go any further. And that is race.**

.. It was an open country for Europeans who confronted people who were radically different than they were. **And that confrontation, I'll be honest, was terrible, bloody and violent.** It was terrible, bloody and violent, **but we conquered this continent.** Whether it's nice to say that or not, we won. And we got to define what America means, **we got to define what this continent means. America, at the end of the day, belongs to white men.**

.. I re-watched perhaps my favorite movie, which is John Ford's *The Searchers*.

.. But we won't be out on that limb forever. At some point, Texas is going to be a wonderful place to live. It's going to be a great place to live. But perhaps our bones have to be in the ground before that will happen."

.. Texas is a wonderful place to live. **And there are a lot of the white man's bones in the ground to make that happen. White people did it.** And I'm not going to ever claim that there wasn't a lot of brutality that went along with it. **But we did it. Our bones are in the ground, we own it, and at the end of the day, America cannot exist without us. We defined it. This country does belong to white people, culturally, politically, socially, everything. We defined what America is.**

.. it's not just whoever happened to do the labor. Other people could have done it. **But no one could have imagined it, no one could have designed it, because no one else did. History is proof.**

DISTOPIAN ALTERNATIVE

About a half of the way through he goes to a pretty dark place really. There's an air of 'if you're not with us you're against us', as what will result in our race losing? A metamorphosis of a people- raceless (the horror!) without any "cultural identity", intent purely on the consumption of goods.

COMMUNITY/IDENTITY/RACIAL SELF IDENTITY

Suffice to say there is a lot to unpack here! There is an obvious heavy reliance throughout on the notion of racial and cultural identity, something that speaks very much to a group that feels emasculated by the prevailing liberal culture of today. He believes that although the sins of white men in taming the continent were true there's no need to be ashamed of your race because "WE WON!"

CONSPIRACY THEORY /STRAWMAN

There are really innumerable examples of this. He believes that the Syrian refugees fleeing Syria aren't actually refugees at all he offers no substantiating evidence to this effect. He claims that 75% of white people are on the wrong track

Collaborative Writing Google 12 Nov 2018: Screen grab of Google docs group work

Video Conference/ Google Docs editing, 12/11/2018

- Beginning: Sinead, Emmet, Simon
- Attention economy and fake news mentioned by several people
- Procedure:
 - Splitting individual texts into paragraphs with headlines to be able to sort them according to general theme
 - Creating a list of headlines
 - Regrouping paragraphs according to content

We need to talk about and discuss the overall sentiment of what our piece will be? We've all said some pretty negative things about the specifics of SM so potentially one of our challenges here would be to have a balanced finished piece. Objective?

From my skimmed read earlier on, it seems that Charlotte and Simon had some particularly well-balanced views.

Yes, good idea, Emmet.

I suppose it could make sense to talk about the sentiment that people have in mind. I like having a balanced view, but I tend toward the upside of SM and the positive aspects.

Unless we plan on going back to our own individual texts to put fresh ideas in, we will be working with what we have? The argument and sentiment should appear organically enough with the pieces of the puzzle we have to put together. So maybe we shouldn't spend too much time on sentiment etc. It should just sort itself out.

I think it will sort itself out. As far as I can see, we have chunks for introduction and conclusion and the rest seems to group itself quite neatly into parts of the main body. I'll go ahead and mark the conclusions and introductions, so we can have a look at the rest.

I guess it doesn't matter if it's balanced if we think the overall is negative, and then that would form part of our conclusion

 Emmet Lyons
8:51 PM Nov 12

Absolutely agree. That's just the vibe I was getting from reading, but if we're all on the same page to an extent, that's absolutely fine.

 Lisa Dawn Abb...
8:50 PM Nov 12

Agreed! Definitely think they've covered the good aspects. There's a chunk in Sinead's too - teaching communities etc

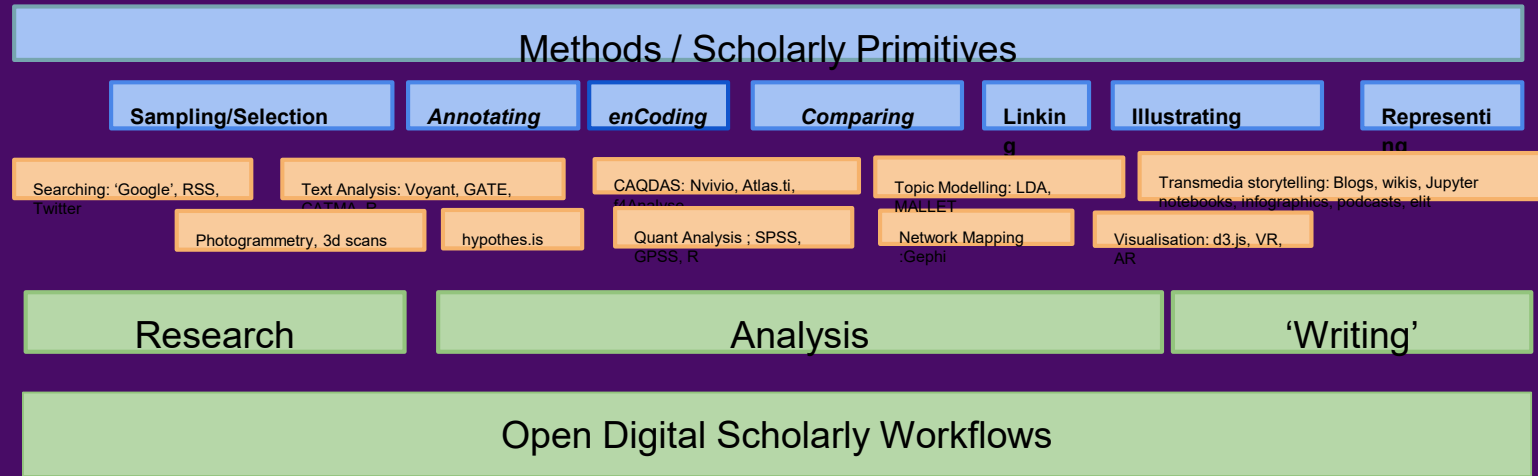

Topic Structure

Reading : Methodological or Epistemological Case study

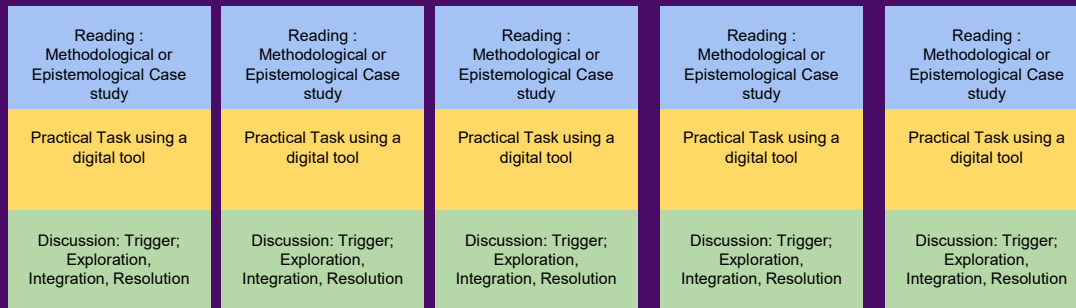

Practical Task using a digital tool

Discussion: Trigger; Exploration, Integration, Resolution

Module Structure: *Workflow*
